Long-Range Transportation Plan Limited Update – Summary of Community Engagement

The 2050 Rhode Island Long-Range Transportation Plan and Metropolitan Transportation Plan, Moving Forward RI 2050, is a limited update to Moving Forward RI 2040, in accordance with federal law (49 USC 5303 and 5304) and the U.S. Department of Transportation regulations 23 CFR 450; 23 USC 134 and 135. This plan is required to be updated every five years and the vision integrates strategic direction of supporting modal plans that are updated at varying intervals. Work on this limited update began last fall with the goal of having the plan approved by December 2025.

This presentation will summarize progress to date, focusing on the community engagement activities staff have completed. Staff will discuss findings from those activities, highlighting where public concerns, priorities, and preferences will inform the plan update.

Staff will also discuss the project timeline in 2025, and plans for the next phase of community engagement. Staff welcomes an open discussion after this presentation to discuss the findings and how best to move forward into the final year of the plan update.
