

TIVERTON, RI

SOCIOECONOMICS OF SEA LEVEL RISE COASTAL FACTSHEET

PROJECT OVERVIEW

Rhode Island's municipalities are in the preliminary stages of integrating planning for sea level rise and climate change into their comprehensive planning process. To support these planning efforts of RI cities and towns, RISPP developed the Socioeconomics of Sea Level Rise project. The project aims to assist coastal municipalities in their long-term planning by attempting to identify population characteristics of the people located within sea level rise (SLR) inundation zones 1, 3, 5 and 7 FT. The data presented in this factsheet places a focus on Environmental Justice and Title VI populations.

METHODOLOGY

The RISPP utilized 2010 Decennial Census data and the latest American Community Survey (ACS) estimates to conduct an extensive data analysis. Staff also utilized CRMC's STORMTOOLS GIS shapefiles to identify the SLR inundation zones. In addition, RI Geographic Information Systems (RIGIS) e-911 data was utilized to identify single family, multi-family and mobile home residential points located within each SLR inundation zone. For more information on the methodology, please reference the **full report** on our website.

TIVERTON'S OCCUPIED RESIDENTIAL UNITS & POPULATION **ESTIMATES**

Tiverton is one of Rhode Island's 21 coastal communities, located east of Portsmouth, and north of Little Compton, Rhode Island.

Tiverton has an average household size of 2.35 (2010 Census). The average household size and the percentage of occupied housing units were used to calculate a population estimate. Approximately 76-79% of the residential units located within each SLR inundation zone are occupied units. Residential units were identified in GIS using the e-911 shapefile. A combination of single family, multi-family

SLR Inundation zone	Residential Units	Occupied Unit calculation (Total Units (x) Occ. Housing Unit Rate in SLR zone)	Population calculation (Occupied Units (x) Tiverton Avg. HH Size)		
		2			
1 FT.	2 SF	(76% occ. HU)	5		
	19 SF,	19			
3FT.	6 Mobile	(78% occ. HU)	45		
	41 SF,	48			
5FT.	20 Mobile	(79% occ. HU)	113		
	67 SF,				
	1 MF,	71			
7FT.	21 Mobile	(78% occ. HU)	167		

and mobile home residential units were identified throughout the various SLR inundation zones. The majority of the units are single family. There is a significant change between the estimated population located in the 3 and 5 FT. inundation zone, with an additional 68 people estimated in the 5 FT. zone. The 7 FT. inundation zone has the greatest population and number of residential units, with 167 people estimated within the zone and 71 occupied residential units.

SLR INUNDATION ZONES

The maps above illustrate each of the SLR inundation zones. Single family units are represented by orange points in the SLR inundation zone maps, while multi-family units are represented by green points. Purple points signify mobile home units.
